Workflow stage lanes (employees)

Analyst: Assigned -> Research started -> Research done

QA: Research done -> QA started -> QA done

FQA: QA done -> FQA started -> Sent to client

Role summary

Client (Company customer): Orders, cases, reports, chat for their company

Analyst (Research lead): Assigned cases; research workflow stages

QA (Quality review): Assigned cases; QA stages after research done

FQA (Final QA): Assigned cases; delivers report to client

Admin (Operations): Onboarding, orders, cases, teams, full platform ops

Super Admin (Platform owner): Same as Admin + future system settings
